

## Meeting notes Central WI Apple Users Group 12/09

At our Mac basics meeting many questions were posed about file permissions and file preferences. Tom stressed the importance of continued Macintosh basic group and self help learning. Some well known pod casts giving us excellent Apple information and basic forums are listed on the iTunes podcast section under technology. They are Typical Mac User, The Mac Cast and Mac Geek Gab.

At the general meeting Sylvia served us some warm delicious cranberry punch. Coffee, soda and cookies were also available. CWAUG business cards were made available for passing out to friends and acquaintances for promoting membership of our users group. The new Apple Macintosh computers were presented during the Apple Keynote presentation. They include the iMac, MacBook, and Mac Mini.

The meeting demonstration was given by Jeff. The valued software bundle package at macupdate.com was presented. The main focus during the talk was Radio Gaga This is a internet radio multi recorder with 10,000+ stations. Many were impressed with the ease of use finding these catorized stations and a big bonus of forwarding the music to iTunes! The second demonstration was a breakout session by Marty our Photoshop expert.

The meeting concluded with a drawing of Home Interior Pro a design software package won by Marty. To celebrate the season many packages of Adobe label software were continiously drawn and when gone some hardware was also drawn until everyone had something to take home.
